## Fetal and infant intrauterine trauma effects webinar

---

We invite you to join Amerigroup community Care for an exciting new training series from Children's Healthcare of Atlanta (CHOA) on fetal and infant intrauterine trauma effects. This webinar will discuss how to be aware of the major immediate and long term neurodevelopmental effects of fetal alcohol exposure and the signs associated with adverse developmental impacts of intrauterine exposure to cocaine, methamphetamine and heroin. In addition attendees will better understand the mechanisms of abusive head trauma, as well as the short and long term adverse effects of this type of maltreatment.

Use the links below to register. Continuing education units (CEUs) will be available for some professional licensures. If you would like more information or an **electronic version** of the registration link, please email [ga360trng@amerigroup.com](mailto:ga360trng@amerigroup.com) for more information.

**Wednesday, April 27, 2016**  
**8 a.m.-9:30 a.m. Pacific time**
