TRAUMA 101 AND BRAIN 101

CEUs for 3 hours of continuing education for MSW (core), LPC and LMFT (related), DECAL, FVIP, POST, Babies Can't Wait Project SCEIs in Area I | Children and Families – Birth to 8 CEUs, and nursing.

TRAUMA/BRAIN 201 AND STS

Training is approved for 5 hours of continuing education for MSW (core), LPC and LMFT (related), DECAL, FVIP, POST, Babies Can't Wait Project SCEIs in Area I | Children and Families – Birth to 8, and nursing CEUs.

COLLABORATE

These free courses provide an opportunity to bring your community partners together that serve families around the topic of complex trauma and its impact on the brain and how to build resilience. You may schedule the training for your staff, but we ask that you think about your community partners and include them on the session. This is a great way to make connections and begin collaboration.

Trauma 101:

Understanding the Impact of Trauma on Children

Brain Development 101:

Understanding the Impact of Trauma on Brain Development

Trauma/Brain 201:

Building Resiliency as a Response to Trauma

Secondary Traumatic Stress:

Recognizing and Managing STS

and Children Services

TRAUMA 101: UNDERSTANDING THE IMPACT OF TRAUMA ON CHILDREN

Course Length: 3.5 Hours

Course Description

This course will provide participants with foundational knowledge about child trauma and child traumatic stress. Three types of child trauma are defined. The course focuses on the impact of complex trauma on behavior and development, and helps participants identify strategies for working with children who have experienced trauma.

Topics Covered

- Child Trauma: Definitions and Types of Trauma
- How Trauma affects Children and Youth
- Overview of Impact of Trauma on the Brain
- Managing Physical and Psychological Safety for Children
- Enhancing Child Well-being and Resilience

BRAIN DEV 101: UNDERSTANDING THE IMPACT OF TRAUMA ON BRAIN DEVELOPMENT

Course Length: 3.5 Hours

Course Description

This course provides participants with foundational knowledge about how adversity and trauma can impact brain development. The course introduces brain architecture and early brain development in children and focuses on the impact of adverse experiences and child trauma on the brain.

Topics Covered

- Adversity & Trauma and the Impact on Brain Development
- Brain Systems
- Adverse Childhood Experiences and Brain Development
- Resilience and Brain Development

TRAUMA/BRAIN 201: BUILDING RESILIENCY

Course Length: 6.5 Hours

Course Description

This course is designed for community partners who have completed Trauma 101 and Brain 101. The workshop focuses on the components of a trauma-informed child and family service system, the importance of cross-agency collaboration, and building resiliency in caregivers, children, youth, and professionals.

Topics Covered

- Trauma-Informed Community System
- Introduction to Collaboration
- Identifying Trauma Related Needs
- Building Resilience in Children and Adolescents
- Taking Care of Self

SECONDARY TRAUMATIC STRESS: RECOGNIZING AND MANAGING STS

Course Length: 6.5 Hours

Course Description

This course is designed to educate various helping professionals on Secondary Traumatic Stress (STS) and its impact. Participants will learn how to assess STS symptoms in themselves and others, explore factors that help to protect professionals from the negative effects of STS, and discover strategies to use these protective factors to manage STS. Participants will also assess their own personal and professional self-care and develop STS management plans.

Topics Covered

- Impact of STS on personal and professional lives, organizations, and the children and families served
- Secondary Traumatic Stress and other stress-related conditions
- Risk factors and symptoms of STS
- Strategies to manage STS
- Individual STS management plan
